The Arts Program

The Arts Program humanizes the airport environment by infusing it with light, levity, comfort and memorable experiences for travelers. This serves to enrich the customer experience, surprising and delighting passengers with unexpected encounters with culture.

One aspect of The Arts Program is charged with developing a broad collection of permanent artwork that supports and enhances SAN's mission. Authority policies allow for a two percent allocation for art, derived from all eligible construction projects. This includes terminals, roadways, and other specified construction. The airport's Public Art collection currently includes 42 permanent works in a diverse range of media including painting, sculpture, video and light-based pieces.

The visual and performing art displays bring texture and depth to the airport environment and engages the imagination, while giving local artists a unique place to show their work.

Today, The Arts Program supports the airport's identity as the gateway to the region by presenting art programming that communicates meaningful and engaging narratives about San Diego's culture, climate, and history. As the program evolves, it will extend beyond the airport, creating partnerships in the local community that enhance the airport not only as a destination for travelers, but as a resource and catalyst for creativity.
