Fort Lauderdale-Hollywood International Airport

Broward County's Fort Lauderdale-Hollywood International Airport (FLL) is in the heart of Greater Fort Lauderdale's Gold Coast. This strategic location provides a catchment area of more than six million people. A considerable portion of the population is affluent and leads the state in travel expenditures.

Strategically located in the heart of the South Florida region, FLL is one of the economic engines that drive Broward County and provides more than 250,000 jobs and generates \$37.5 billion annually for the local economy. There are 559 full-time employees at FLL and North Perry Airport, and the FLL Operational Budget (FY21) is \$280.1 million.

In 2019, FLL ranked as the 18th busiest airport in the U.S. with 36.7 million total passengers. FLL was recognized by Airports Council International, a recognized authority in the aviation industry, as the fastest-growing large hub airport in the U.S. in recent years.

With an average of more than 380 departures a day, FLL offers non-stop service to 84 U.S. cities and global connectivity to 66 international destinations in 33 countries.

To meet the growing demand for the future, FLL is reimagining itself. In October 2019, the airport completed a four-month rehabilitation of its North Runway (10L-28R). Portions of the runway date back to 1943 when FLL was a Naval Training Base during World War II. In 2014, FLL completed the construction of a new South Runway (10R-28L). The airport's terminals and concourses are being completely remodeled, updated, and expanded through a \$2 billion dollar program. New and exciting amenities have been added to enhance the customer experience. Located throughout the terminals are "Baby Oasis" lactation suites, 100 new restaurants and gift shops, innovative technology like free WIFI and the FLL app, and pet relief areas.

New international passenger processing facilities have been added to meet the rapidly growing increase in international passengers and FLL is also nearing completion of the design of the new Master Plan that was approved by the FAA and the Florida Department of Transportation (FDOT). The plan has identified future passenger demand and has outlined what facilities, changes, and improvements are required to meet that demand for the next 20 years. Once finalized and approved by the Board of County Commissioners, Broward County's economic powerhouse will continue to improve the overall guest experience and fuel the regional economy.
